

Marcell Kovács

ABOUT ME

I am studying International Economy and Business and I have a degree in both Political Science and Computer Science Engineering with a broad interest ranging from mathematics through economics and business to diplomacy and political science. I strongly believe that interdisciplinary perspectives are the best way to move our world forward.

MY GOALS

I would like to work on international technology and digitalization policy and diplomacy in an EU organisation or the UN representing Hungary. I would also like to start a business and teach at a university on digital economy. My aim is to develop the use of technology in the world as widely as possible. I am eager to help the world in digitalization with international cooperation.
